ABOUT US

JAGDAMBA POLYMERS is a sole proprietor firm specializing in packaging for different industries like food grains, SS pipes, PVC pipe, PVC profile, fertilizers, logistics, wires and Rods and many more.

We have been providing our service since 2014 and satisfying our customer's wide range of requirements. We deliver a comprehensive product range with a commitment to quality, service and reliability. Our standard range consists of PP woven bags mainly used in SS and PVC pipe as outer bags, in food grains and in agricultural equipment. With the many years of experience in this field we ensure to supply you the product to match your exact requirement and also gives the best result of the printing on the fabric which looks more attractive. And we are still increasing our product range across the country following the Make in India Concept.

We at Jagdamba polymers consider our employees as our best assets. We are convinced that this leads to more creativity and productivity, and that is of the utmost importance for our customers & suppliers. Together we deliver our customers sustainable customized packaging and developments through co - creation.

Our motto is: Let's grow together.
Together we work on tailor-made products, from concept to execution.

We are here to serve you the best.
